

The Integrated Management System Policy

We produce high-quality industrial valves for regulating the flow of liquid and gaseous media, as well as iron castings.

Our main goals are: meeting the expectations and requirements of customers, care for the natural environment, efficient use of energy, improving health and safety conditions and meeting the needs of interested parties.

We take into account the principle of sustainable development in our strategy. Social responsibility and care for the environment are important elements of our company's operations. We implement projects that have a positive impact on the natural and social environment.

We are committed to ensuring compliance with legal regulations and other requirements in the field of the environment, energy consumption and operational health and safety.

We achieve our goals through:

- designing and manufacturing products with a view to reducing the negative impact on the environment and improving energy efficiency,
- ensuring safe and hygienic working conditions in order to prevent injuries and health ailments,
- systematic monitoring of indicators and parameters defining processes,
- improving the effectiveness of the Quality, Environment, Health and Safety and Energy Management Systems through thorough supervision over the processes,
- qualification of suppliers, taking into account the quality, environmental impact and energy efficiency of the products and services provided,
- cost-saving measures, with particular emphasis on the rationalization of the consumption of raw materials and energy utilities,
- eliminating hazards and limiting health and safety risks, primarily in the area of ergonomics, as well as where work is particularly dangerous and where there are harmful factors,
- development of employees, improving their qualifications, awareness and responsibility,
- consultations and cooperation with employees or their representatives,
- implementation of pro-ecological and pro-social activities.

The Management Board of the Company undertakes to ensure the availability of information and resources necessary to achieve quality, environmental, energy and health and safety goals.

The Integrated Management System Policy is known, understood and followed by all employees of the Company and is available to stakeholders.
