

Quality Policy

We offer our Customers high quality industrial fittings that are used to cut, regulate and secure the flow of steam, liquid and gaseous media, and we also produce machine and valve castings.

The main objective of the Company is to meet the expectations and requirements of Customers. We want to expand cooperation, build customer trust and supplier credibility.

Our Quality Policy is implemented on the basis of the following principle:

“Customer is most important for the organisation!”

We are competitive on a dynamically changing market, offering products with an optimal price/quality ratio.

We promote innovative development, realised through the implementation of modern technologies that guarantee product quality and safety at the stage of design, manufacture and delivery. The quality policy supports the strategic direction of the company's development.

In order to achieve our goals:

- we comply with legal requirements - we ensure and confirm the compliance of the quality of supplied products with binding legal regulations, adopted standards and requirements agreed with a Customer;
- we achieve the assumed objectives, indicators and parameters defining the processes through monitoring, systematic measurements, verification and analysis;
- we improve the effectiveness of the Quality Management System used in the company by carefully planning and supervising the main and auxiliary management processes;
- we ensure that our employees achieve the necessary qualifications; we raise their level of awareness and responsibility,
- we focus on teamwork and we develop creativity and initiative.

The quality policy is known, understood and observed at all organisational levels of the Company. It is publicly available to stakeholders.
